Objective

Computer Science Engineering student with hands-on experience developing full-stack web applications using React.js, Next.js, JavaScript, TypeScript, Node.js, Express.js, Flask, and MongoDB. Experienced in building responsive interfaces, REST APIs, CRUD functionality, authentication, and database-driven applications. Strong problem-solving and analytical skills with a quick-learning mindset. Seeking a MERN Developer Intern role to contribute to real-world web products and strengthen full-stack development skills.

Education

B.E., *Shri Madhwa Vadiraja Institute of Technology and Management*

CGPA: 7.62 | 2023 - Present

12th standard (PCMB), *Vidyodaya PU College*

88.33% | 2023

10th standard, *Vidyodaya Public School*

90.33% | 2021

Skills

- **Languages:** JavaScript, TypeScript, Python, Java, C
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Flask
- **Database:** MongoDB, SQL/MySQL
- **Tools:** Git, GitHub, VS Code, Axios
- **AI/ML:** Machine Learning, OpenCV, Tesseract OCR, YOLOv8

Projects

Criminal Record Management System

- Developed a full-stack web application for secure criminal record management with authenticated and role-based access.
- Implemented CRUD operations, record search, responsive interfaces, and API-based communication between frontend and backend.
- Integrated MongoDB for persistent data storage and implemented role-based authorization for different users.
- Technologies: React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, Axios.

AI-Based Smart Traffic Congestion Optimization System

- Developed a web-based traffic management application to analyze traffic conditions and provide adaptive signal timing recommendations.
- Built the React.js frontend and integrated it with a Flask backend for traffic-analysis and AI processing.
- Implemented vehicle detection, counting, and traffic-density analysis using computer vision.
- **Technologies:** React.js, Flask, Python, YOLOv8, OpenCV, TensorFlow.

Accident Alert & Emergency Response System

- Developed an application for accident detection and emergency response using OCR-based number plate recognition and geo-tagging.
- Integrated vehicle identification, location data, MongoDB storage, and automated notifications to support faster emergency response.
- **Technologies:** Java, Tesseract OCR, MongoDB, GPS/Geo-tagging, Twilio.
